July 21, 2009

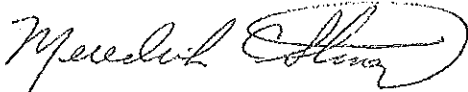

To Who it may concern:

Ref: UV 254NM transmissions

Shortwave, 254nm ultraviolet wavelength is blocked by ordinary window glass. Also, any substrate that is at least ¼ inch or thicker also blocks this wavelength.

The use of a film over the glass is not required but can be used if the customer wants more protection.

Regards;

Meredith Stines
President/CEO/Owner
American Ultraviolet Co., Aetek UV and Lesco UV Systems
